

Adolescent vaccination is a team effort, and you will need help carrying out your QI project. For each vaccination role, identify providers and staff in your clinic or health system, even if they do not currently have a vaccine specific role.

Vaccination roles in your clinic

Schedule appointments	
Review and flag charts	
Prescribe vaccines	
Administer vaccines	
Plan for next dose	
Support QI efforts	

Now that we've identified the different people involved, let's think about who will be most important to your QI team. What tools, training, or information will each of these people need?
